

"Professional Products, Smart Solutions"

ATEKSIS

We strive to provide highest quality products complemented with most comprehensive implementations to our customers. Ateksis is and will be your preferred technology solution provider and systems Integrator in Broadcast, Building Electronics, Professional sound and Lighting, Telecommunications and Professional AV systems. Each of our business units is managed by experienced industry veterans supported by dynamic team of engineers. With Customer satisfaction being in the core of our business model, we continue to look for developing long term relationships with our customers as complete technology provider.

Since 1998, Ateksis has been providing technologies that combine innovation, quality and reliability. The company focuses on advance technologies in Building Electronics, Broadcast, Professional Sound&Lighting, distributes a wide range of products of leading manufacturers to local and international markets, as well as, makes system design and integration with experienced and expertise engineering team.

Operating with three business units, namely building electronics, broadcast and prosound and lighting, we provide marketing distribution , presales, aftersales support of many leading brands like Sony, Bosch Security Systems, Aastra, Philips, Ascom, Ediol, Kramer, Altman, Zenitel, Ferimeks, DHD, Tiffen, Glidecam, Cavision, FrontPorch, Varizoom, Duran Electronica, HID, to more than 200 resellers and system integrators.

In addition, Ateksis provides support for consultants, system integrators, installers. This is backed up with fast deliveries, extensive training and customer support.

Product portfolio for one-stop shopping for professionals;

- Closed Circuit Television (CCTV) Systems Including State of the Art IP- Solutions
- Access Control
- Intrusion Detection and Perimeter Security
- Fire Alarm
- Security Management
- Public Address/Voice Evacuation
- Congress and Conference
- A/V Presentation
- Sound Reinforcement and Control
- Studio and Theatrical Lighting
- Dimming and Control
- TV and Radio Studios
- Live Broadcasting and OBVAN's
- Production, Grafics and NLE
- Payout, Automation and Digital Archieving
- Public Displays and Digital Signage
- Enterprise Communication
- Medical Solution
- Tablet PC

Quality Management

Our Total Quality Management Process provides the basis for analyzing customer requirements, defining the processes that contribute to the achievement of a product or service that is acceptable to the customer, and provisions for keeping these processes in control. Customer satisfaction plays a center role in our Total Quality Management process. It is a comprehensive process of satisfying the customer, from requirement definition till delivery which ensures the proper attention and control that must be given to all features of a project to ensure total customer satisfaction.

In addition to obvious characteristics, like form, fit, function, and reliability, the Total Quality Management Process ensures long term maintainability, ease of use, appearance and countless other aspects contributing to the overall value to the customer. Our engineers with great industry knowledge and experience will guide customer thru this detailed process.

System Integration

Today, many companies have systems running on different platforms. For those companies that require the most difficult issue and one that many of the costs, and to integrate these different systems to work in harmony.

For system integration needs a deep knowledge and experience required. This need not occur only from a technological field, and includes many different areas of expertise. System integration and targeted point another of the different systems running applications, data warehouses, a common area of support, and as a result of information from different places, a single point, pulling, information management, and transportation to facilitate.

Ateksis as product supply and installation of our unique combination of knowledge and experience in the field through a comprehensive system integration solutions from a single source would provide the opportunity ..

Business Center

Ateksis provides universal solutions for both low level and high level demands in a building with worldwide brands as a system integrator. With Ateksis' standalone and integrated systems, you will have smart buildings equipped with the latest technology.

Shopping Center

Shopping Malls are equipped by Ateksis to provide a comfortable and safe environment for visitors and shops. Professional security systems, background music and announcement, digital signage, LED video displays, reinforcement sound and lighting systems creates necessary attractivity for shopping.

Hospitals

Ateksis can arrange a totally integrated hospital enterprise environment, where clinical, management, and technical systems work together smoothly and proficiently. Quicker response improves workflows and communication within and especially between departments, In addition, better process efficiency reduces time losses which give medical staff more opportunities to improve the quality of care on a day-to-day basis. Patients will be happy to experience better information and service, and a quicker response to medical alarms and information can also save lives.

Theatres

With the expertise and experienced engineers of Ateksis, theaters are equipped with latest technology sound, lighting and display systems.

We provide recording equipment and media as well as video production gear and anything else you need to professionally conduct theaters, shows, concerts, gigs, church services, programs, school productions and more. Our team of sound experts will introduce you to the largest selection of professional audio & lighting equipment - our vast knowledge in audio and lighting equipment we have the power to fit the best configuration for your application..

TV and Production Studios

Ateksis offers solutions for new installations and upgrades on existing systems. In particular our expertise lies in the provision of solutions for Studios, Outside Broadcast Facilities, Transmission and Automation, Master Control Rooms. Our Engineering team established in response to customers' requirements for latest broadcast technologies suit any need and budget. . Turnkey solutions provided by Ateksis consist of latest HD and IT technologies for production, news and live contents.

Ateksis is the product supplier of many national broadcaster in Turkey.

Broadcast Equipments

OB Vans equipped with latest HD and IT technologies and giving space-efficient accommodation for essential staff and equipment are supplied as turnkey solution for broadcasters, production houses and rental companies. Ateksis supply Outside Broadcast Vehicles for multi purpose production system which are easily deployable at any time. We provide from a simple 4-camera to a 24-camera High Definition, multi expanding side OBVAN, as complete solution including coach building, audio video equipment and broadcast cabling.

Hotels

Ateksis offers integrated solutions for hotels. Fire Alarm, Public Address & Voice Alarm, CCTV, Card Access, SMATV, IP-TV, PBX and Professional Sound and Lighting Systems.

Transportation

Our primary objective is to work with customers to provide tailor-made, cost-effective solutions for their current and future needs. We supply highways, tunnels, metro, railways useful systems to control and manage traffic with systems involving CCTV, Public Address, Intercom telephony, Paging, Plate Recognition and Wireless Communication Solutions.

Airports

Ateksis has been at the forefront of technology within the airport industry with a number of installations by our core competencies in CCTV, fire alarm, card access, intercom telephony, wireless solutions, public address and display systems. Our engineering team has developed special softwares and interfaces for customized requirements of airport authorities, such as integration with FIDS and Central Database systems.

Convention Centers

In today's business world, technology is an essential parameter to communicate the right messages in an effective way. With the help of our audio visual material used in presentation, meeting, seminar, congress, education, concert, theatre and movie demonstrations, we are able to hit the target directly. Ateksis implements the correct and effective solutions to your organizations with hi-tech products and solutions. We have completed many meeting rooms and congress centers with our professional design, fascinating the audience with well-distributed and calibrated audio environment, video shows, sound, lighting and imaging effects.

Ateksis is Global... We have no geographical boundaries.

"Professional Products, Smart Solutions"

ATEKSIS

electronic security solutions

Electronic Security Solutions

Ateksis has been providing technologies that combine innovation, quality and reliability.

Security Systems is part of Building Electronics business unit of Ateksis. We provide below mentioned systems, solutions and services from presales to after sales, i.e. demand analysis, survey, design, configuration, optimization, pricing, integration, developing interfaces, supervision, installation, maintenance, upgrades and updates by our experienced and qualified engineering team. We provide turn-key solutions to Airports, Shopping Malls, Business Centers, Transportation Sectors, Hospitals, Hotels, Banks, City Surveillance, Universities, Army, Police, Government Institutions, Private Corporations and Construction Companies.

- CCTV & IP CCTV
- Fire Alarm
- Access Control
- Building Management
- Intrusion Alarm
- Public Address
- Wired / Wireless Transmission Systems
- Intercom

broadcast systems

Broadcast Systems

Ateksis designs, markets, and supports systems with a wide range of innovative products for use in broadcast, distribution, live event and production applications. we provide customers with a comprehensive range of solutions for the creation, management and distribution of content, as well as providing the tools necessary to transition seamlessly and cost-effectively to digital, HDTV and 3Gbps operations.

Our systems team has both the technical and operational experience to manage small and large projects for you with the added operational experience to turn your concept into reality.

- Systems Cameras
- Camcorders
- VTR's, Decks, Recorders
- Editing
- Production Switchers and Digital Effects
- Lenses
- Camera support&carrying
- A/V Routers
- Multiwievers
- Distribution and Processing
- Playout and Automation
- Media Archive&content management
- Production Monitors
- Studio Lighting
- Digital Audio Mixing Consoles
- Microphones
- Audio and Video Measurement
- Audio Codecs

Enterprise Communication Solutions

Ateksis is supplying unified communications platform in which the essential part is still telephony. For dynamic, reliable solutions for connecting people and sharing knowledge are the key elements that we focus on. We understand your business communication needs and put our best effort for enabling real-time collaboration, streamlining communications, and improving productivity and performance. Our aim is to present complete end-to-end offer which provides communication is always available anywhere and anytime. Our product portfolio consists of a full range of both traditional and open standard IP-based PBXes and server based IP-PBX communications systems, gateways, telephone terminals, VoIP endpoints, wireless products, as well as a full suite of advanced productivity software applications that includes Unified Communications, Web and Audio Conferencing, and Contact Center solutions.

- PBX Solutions
- Mobility Solutions
- IT Telephony
- Contact Center
- Widerange of Terminals
- Paging
- VoWiFi/DECT/IP DECT Solutions

Professional Video, Sound and Lighting Systems

In today's business world, technology is an essential parameter to communicate the right messages in an effective way. With the help of our audio visual material used in presentation, meeting, seminar, congress, education, concert, theatre and movie demonstrations, we are able to hit the target directly. Ateksis exists to apply the correct and effective solutions to your organizations with its hi-tech equipment and solutions. Ateksis has countless successful projects about unit of Professional A/V and Lighting Systems. Ateksis's professionally designed systems will fascinate the audience with homogenous audio environment, lighting effects, video editing, sound and imaging effects.

- Conference and Simultaneous Systems
- Video Screens
- Led Screens
- Digital Display Distribution
- SMATV - IP TV

Medical Solutions

Information technology has entered our daily lives today and in the health sector with successful applications of health institutions Ateksis aims to increase the quality of service. Thanks to new technologies support integration Ateksis improving business processes, service quality increases. Ateksis provide appropriate solutions on the need for hospitals, with worldwide partners.

- Tablet PC
- Nurse Call Systems
- Blue&Pink Code System
- VoWiFi/DECT/IP DECT Messaging
- Monitors
- Cameras
- Recorders
- Printers
- Print Media

TRT COÇUK, HD VIRTUAL STUDIO

Ateksis is selected by Turkish Radio and TV Corporation (TRT) to install a full HD Virtual Studio for TRT Çocuk Channel in Istanbul. The project successfully completed within 4 months and put into operation. The project mainly included Sony HDC-I400 cameras chain, Sony MVS-8000 video switcher, Studer Vista5 Audio Mixing Console, ORAD Virtual Studio HW & SW on Vinten e-heads, Jimmy Jib and many other components. Complete design, wiring, broadcast consoles, racks, virtual platform, commissioning and training provided and implemented by Ateksis' engineers and technicians.

TRT NEWS, HD STUDIO

TRT News establishes itself as main news source for Turkey. TRT selected Ateksis to implement an innovative high quality HD Studio production system for TRT News channel in line with its vision to be in the forefront for the technological advancements in the Broadcast Industry. Ateksis engineers and technicians completed the studio in a very short period that includes cameras, VTRs, character generators and many more.

NEVROZ TV, ERBIL IRAQ

Nevroz TV and Radio is the regional government broadcaster in Northern Iraq. Partnering with main contractor Zagros Construction for this TV Center Compound, Ateksis designed, supplied and installed all video, audio, lighting and sound system for the TV Production Studio and Sound Recording Studio. The TV Production Studio has five Studio Cameras together with studio pedestals and jimmy jib arm. The studio is equipped with PA systems for audiences, robotic lights for shows and live concerts.

AZERBAIJAN PARLIMENT

We have installed all electronics, IT and visual systems of new parliamentary hall of the Republic of Azerbaijan, in 2006. For each parliamentary seats, there are delegate mic, channel selector for listening interpretation, card ID, voting panel, a touch screen motorized monitor with thinclient terminal for viewing voting results, agenda and archive documents. There are also two large video screens to display video, presentations, voting results and as well as display speakers. With automatic camera control software, cameras instantly turns to speaker and display the name and previously recorded data of the speakers. A special custom design software has been developed and integrated with Bosch DCN software, in order to meet for specific operations and adaptation with Azerbaijan Language.

MARDAN PALACE, ANTALYA TURKEY

Ateksis's complete IP Video solution is providing a fully IP CCTV surveillance solution for the new Mardan Palace Hotel in Antalya, Turkey. The hotel has 560 rooms, a 12,000 sq ft spa, and its own beach containing 9,000 tons of sand imported from Egypt. 10,000 m2 of gold, 500,000 crystals, 23,000 m2 of Italian marble are used in the construction of the hotel. It has the Mediterranean's largest swimming pool within which is an aquarium containing 2,400 fish. The system has more than 400 cameras which was installed by Ateksis. Hotel Security Team monitors live and recorded video from the cameras and manages alarms of Intelligent Video Analysis (IVA). The IVA feature helps hotel to improve the overall efficiency of the monitoring operation and to speed up incident response. For example, if the IVA detects an alarm like objects entering, leaving or just being within an area, a notification is sent to Control Room which automatically displays the relevant camera for that area and initiates an alarm management scenario

TKI- GENERAL DIRECTORATE OF COAL

Ateksis's video technology experts are providing wide area CCTV surveillance for seven coal mining complexes of General Directorate of Turkish Coal Institution. The new IP Video CCTV system was designed and installed by Ateksis. As well as the open mine area the CCTV is monitoring the truck delivery area and administration buildings. Camera locations are connected to admin building via wireless bridges, situated 30km far in some places. Those locations are equipped with tower, solar energy panels, outdoor cabinets and LAN switches. In the control room, which is currently located in the main admin building of each mine complex, operators use PC workstations running video management software. The operators view live video from any of the cameras and recorded video Network Video Recorders (NVR).

TIM MASLAK SHOW CENTER

Thanks to Mr. Turker Inanoglu who has invested a lot in the most prestigious show center in Istanbul. This show center project is one of our typical projects which we have implemented all of Ateksis's product range. Starting with Building Electronics like CCTV, Fire Alarm, Voice Evacuation, SMATV and building automation, then Conference and Interpretation systems, Video Display systems, Professional Sound and Lighting as well as Broadcast systems. The show center is in operation since 2005 and has hosted many worldwide known shows. All design, cabling, wiring, installation, commissioning and training has been realized by Ateksis team.

ISTANBUL TRANSPORTATION CO.

Ateksis is providing the IP CCTV and digital Public Address solution to Istanbul Transportation Co. The system is implemented at 33 stations through tramway line between Kabatas and Zeytinburnu. Ateksis was chosen for this prestigious project because we could meet a stringent set of criteria. The intelligent video analysis should detect and produce an alarm if any passenger passes the "yellow line" when there's no car on the rail. Furthermore, we integrated Public Address system with IP CCTV solution. When the alarm is triggered at any platform, an automatic announcement is sent to that platform. The video and alarm management software is used by the operators at central control room to monitor the platforms. The operators can send the live or pre-recorded messages to all station or the desired stations by using PC based Call Station software developed by our engineers

ADNAN MENDERES AIRPORT

Ateksis divided the terminal building 100 different physical zones for easy administration of the P.A. system and fire alarm message distribution. Bosch Praesideo Digital P.A. System was chosen for the distribution of different live and pre-recorded message in CD quality and to ensure the full integration with 3rd party systems.

After measuring the noise level of every zone, the engineers chose the type of the loudspeakers. Installation plan was made with an EASE Acoustics Design program on 3D model. For outside areas 187 pieces of horn-loudspeakers, for inside areas 4 pieces LPI-UC20E sound projector, totally 15 pieces LBC3200/00 and LBC3200/10 line array loudspeakers were used in the project. LBB4442/00 line supervision card was used for the supervision of the loudspeakers line. So the operator would be informed immediately in case of a fault.

32 pieces of Praesideo Power Amplifiers were used to handle the power requirements of the loudspeakers. 30 pieces of ambient microphone were put into the crowded areas of the building. 18 pieces of call station were installed at information desk and also passenger exits for live speech and pre-recorded message distribution.

Success stories

TURKISH POLICE, IP-PBX and VoIP in 81 SITES

Turkish Police was one of the earliest adopters of Wide Area Networking in Turkey and their Department of Anti Smuggling and Organized Crime (KOM), was looking for an IP telephony solution. Their top priority was the reliable, secure, state-of-art and future proof solution which delivers the integrated and efficient communication throughout their operation.

KOM has chosen the state-of-art IP Telephony solution from Art Telekom, authorized partner of Ateksis. The solution consists of IP telephony solution at 81 cities of Turkey by using server based IP PBXes, IP and legacy wired terminals, DECT terminals for on-site mobility and central management for alarm and configuration for each site.

During installation phase, the other Ateksis's partners, Dengebir and Delta, were joined to the team. Thanks for efforts of all parties, all the systems were installed and put into operation in 21 days.

EVRENSEKI-ILICA-COLAKLI CITY SERVEILLANCE

Evrenseki, Colakli and Ilica in the region of Antalya has adopted Ateksis's complete IP Video solution to provide CCTV based city surveillance. The new system is helping the authorities increase public safety with remote monitoring of public places, road, hotels and beaches.

The system was installed by Ateksis on a optical fiber network and consists of both fixed and autodome IP cameras monitoring the the region. At the hearth of the system is the CCTV and alarm management as well as license plate recognition software, installed in the central control room situated at the district gendarmerie station. Operators use PC workstation monitoring live video feeds. The recording of all the camera video is accomplished by using iSCIS hardware. IP CCTV architecture enables the operators to view live or recorded video from any camera or iSCSI, anywhere on the IP network.

SALEKHARD CITY THEATRE

This is a good example of our projects completed in extreme geographical regions. The main contractor YAMATA construction company, has asked us to implement the Sound, Lighting, and Video Systems projects which has been released by government authorities of Salekhard. We have supplied all equipment, Community Loudspeakers, Lab Gruppen Amplifiers, JBL Cinema systems, Christie Cinema Projector, Martin Robotic Lights, High End Robotic Projectors and Sony video and editing systems. This multipurpose hall is being used for shows, theaters and concerts. All cabling, installation, as built projects, commisioning and training has been realized by Ateksis' team.
